PRODUCTIVITY

Word / Excel / PowerPoint

Comfortable

FOCUS

- Cybersecurity fundamentals
- Networking & infrastructure
- Linux & self-hosting
- Security-oriented software

SUJITH C

CYBERSECURITY / SYSTEMS / NETWORKING

B.E. Computer Science & Engineering · BMSIT, Bengaluru · 2nd Year

Currently a 2nd-year B.E. Computer Science & Engineering student at BMSIT, Bengaluru, focused on cybersecurity, systems, and networking. Hands-on experience includes running a Debian home lab, self-hosted services, remote access, and security-focused software prototypes.

SELECTED WORK

Systems Lab - Home Infrastructure FEATURED / SYSTEMS

- Built and operated a Debian 12 home server with CasaOS for media, storage, and game-server workloads.
- Configured Jellyfin, network storage, Minecraft hosting, and Tailscale for secure remote access across networks.

CryptoDrishti CYBERSECURITY / CRYPTOGRAPHY

- Built a prototype that analyses cryptographic usage and produces a Cryptographic Bill of Materials (CBOM).
- Structured cryptographic dependencies and findings so they are easier to inspect and understand.

SurakshaScore CYBERSECURITY / DIGITAL HYGIENE

- Built a personal digital-hygiene dashboard prototype around checks such as 2FA and password practices.
- Turned checks into practical recommendations for improving everyday security posture.

Aether Health AI-ASSISTED PRODUCT / PROTOTYPE

- Developed an AI-assisted personal-health companion prototype focused on organising and surfacing useful health context.
- Designed the product flow and interaction model while keeping the implementation clearly prototype-stage.

EDUCATION

BMS Institute of Technology and Management (BMSIT), Bengaluru CGPA 8.2 / 10

B.E. Computer Science & Engineering · Currently in 2nd Year

PRACTICAL SYSTEMS EXPERIENCE

HOME SERVER

Debian 12 + CasaOS for self-hosted services, storage, media, and game-server workloads.

REMOTE ACCESS

Tailscale for secure access to the server across networks without exposing services directly.

OS ENVIRONMENTS

Hands-on setup of operating systems, dual-boot and multiboot environments, plus basic terminal workflows.

HACKATHONS

Smart India Hackathon

INTERNAL COLLEGE ROUND

Won the BMSIT internal college round.

Avinya 2.0

NATIONAL LEVEL HACKATHON

Participated at the national level.
